

A collage of industrial equipment including RTVs, RGVs, spreaders, and port cranes. The collage is divided into four sections, each with a label in a black rounded rectangle. The top section shows a yellow RTV and an orange RGV. The middle-left section shows a blue RTV. The middle-right section shows a blue and red spreader. The bottom-left section shows a port crane. The bottom-right section shows a port crane with a container.

# KabelSchlepp Dynamic Cable & Hose Management Systems perform several primary design & performance objectives

Cranes must have the capability to constantly run, which is why the latest crane technology requirements call for the innovative designs, quality and experience only available in KabelSchlepp Crane Systems (KCS). Our crane systems supply uninterrupted power, data and signal in perpetual motion 24-7-365. KabelSchlepp offers turn-key systems and total project management to ensure that our systems go on-line and function properly for years. We carefully assess your needs and supply concise and straightforward recommendations that result in the right system for each application. Detail oriented up front consultation and investigation ensure that our customers save time and money when purchasing, installing and operating a KCS.

## Key factors in supplying the right system the first time are...

- Innovative products, materials and periphery components.
- Continual factory product development and relentless testing of all KCS components (30,000km + travel life cycle).
- The largest product and ancillary component range available anywhere in the world.
- Utilization of advanced reinforced polymers, composites as well as high strength aluminum, plated and stainless steels allow fully customize crane systems to bring our customers the lowest purchasing, delivery, installation and operating costs.
- 50 years of experience and a degreed engineering staff that are KCS experts means no hollow promises, just performance.
- Prompt delivery and service from dozens of global engineering, manufacturing and warehousing locations, including our state-of-the-art facility in Milwaukee, WI, USA.
- **FREE OF CHARGE** application assessment, system design, development, and quotation.

# The benefits KabelSchlepp Crane Systems deliver to crane builders and users

- Accelerations in excess of 3G's
- Operating velocities in excess of 1,500 feet per minute
- Properly manages continuous flex cables and hoses for power, data, signal (fiber optics), hydraulics, pneumatics, and other fluids while reducing typical festoon cable length requirements by nearly 50%!
- No supplementary drive or control systems required
- No maintenance (with regular inspections)
- Reinforced TFE glide shoes and slick stainless steel gliding surfaces
- All weather resistant
- Patented modular design means fast and easy installation, service and assembly
- KabelSchlepp Extended Travel Systems of more than one kilometer possible
- No cable storage station and structure required
- Total System Warranty; ISO & QS 9000 registered facilities in the USA

## The KabelSchlepp Crane System...

KabelSchlepp Crane Systems (KCS) are composed of 5 primary components:

- 1. Cable & Hose Carrier Systems:** KabelSchlepp's industry leading modular cable and hose carrying systems utilize patented designs available in a wide range of metallic and non-metallic, green-sea rated materials to ensure strength, stability, performance, and optimal system longevity. Open or totally enclosed tube systems are available.
- 2. Continuous Hi-flex LIFE-LINE Cables & Hoses:** KabelSchlepp offers LIFELINE brand continuous Hi-Flex cables and hoses as well as other industry leading cables and hoses preferred by our customers.
- 3. Strain-Relief:** Patented, reliable, easy to install and maintain strain-relief and clamping systems.
- 4. KCS Drive-Arms:** Easily adaptable, floating KCS drive-arm (accepts lateral misalignments).
- 5. Guidance Troughs:** Patented KabelSchlepp brand extruded aluminum, non-metallic and/or stainless steel guidance trough systems. Open or totally enclosed styles are available.

For quick KCS component reference, see KS 2001 Catalog sections:  
1.00, 2.00, 3.00, 5.00, 6.00, 12.00, 22.00, & 23.00

With facilities in over 35 countries around the globe and manufacturing in Milwaukee, WI, KabelSchlepp is able to provide unprecedented excellence, quality, dependability, and service where ever you may be. US facilities are ISO and QS 9000 certified.
